Corrected Copy

Mr. Tom Vanderpool
OneDisc.com[®], Inc.
4668 Murray Ave.
Saint Paul, MN 55110-3425

Dear Mr. Vanderpool:

You submitted sample mailpieces to our Engineering Department to test for processing on our letter-size automation equipment. Your mailpieces are "one-way disk mailers" which contain a single optical disk from OneDisc.com[®]. You requested a determination for their eligibility at the automation letter-size rates.

Description

Each mailpiece measures 8.25" x 5.75" inches and weighs 1.4 ounces. Enclosed in each mailpiece is a disk that is positioned on the vertical center line. You identify the piece as Expericard[®].

Tests

The samples were run three times on automation equipment to simulate outbound processing. The pieces were not mixed with other mail to simulate a homogenous tray of outgoing mail.

Results

The samples processed as expected and there were no hard jams associated with any of the samples.

Conclusion

Based on our review of the mailpieces and the results of the test by our Engineering Department, it is determined that your mailpieces are machinable and meet the physical standards for the letter-size automation rates.

This letter-size automation mailpiece approval is only for the physical standards. This ruling is based on the mailpieces that you presented for testing of your one-way disk mailer. If the physical characteristics of your mailpieces change or the specifications stated above are not the same, this ruling will not apply. To be eligible for the automation letter-size rates the mailpieces must also meet all addressing, barcoding, and tabbing standards for letter-size mail.

When you or your clients mail this piece, please present a copy of this letter to the Business Mail Entry Unit of mailing.

If you have any questions, please contact Cynthia Gray at (212) 330-5328.

Sincerely,

A handwritten signature in black ink that reads "Edmund J. Wronski".
