

Expericard®

A Postcard with the Power of a Disc!

Distributed in North America
by OneDisc.com, Inc.

Registered at the PCSC in New York City:
Letter number 856260, dated April 3, 2007, Type 6
"Excellent feeding and stacking; No Jams or Flyouts"

Expericard® Postcards are a revolution in optical media packaging - a completely new way to communicate. These patented postcards put the power of a DVD or CD-ROM right into your customers' hands.

With Expericard you send a postcard and the receiver gets the whole experience. No downloads. No interruptions. No limits on content. No compromise on quality.

As the Expericard is produced in a fully automated fashion, the cost per unit is low. The postage is also reasonable as it mails at **USPS letter rate (not a flat), machinable and automation compatible**, which makes the Expericard a most cost effective solution for direct mail. Also ideal for product brochures, museum souvenirs, greeting cards, sporting event souvenirs, and other interactive digital delivery.

The Expericard can be *individualized* beyond the name and address. The disc art can be also individualized and more importantly, each CD-ROM, by using the **PID technology**, can contain data that is unique to the receiver such as pre-populating a form! **AutoCount™** response tracking, which counts the number of discs being used in a given time span, can also collect other data as desired.

[Expericard Formats]

All Expericards are printed using the highest quality methods on a special cardstock specifically designed for the best durability during postal handling.
