

CrystalCD™ Designer Disc

A Disc with a unique view

Distributed in North America
by OneDisc.com, Inc.

Looking for that Unique Shaped Disc but want it to work on every platform?

The solution is simple: The CrystalCD from OneDisc.com. It has all the features of a 180MB "Mini" CD, but is a full sized 12cm CD. Therefore it is recommended for use across all platforms. Features include:

- Clear see through integral outer area.
- 180MB Capacity CD-ROM or CD-R.
- Fits in all CD disc drives -
Recommended for MAC and PC hybrid Discs.
- More creative space for any custom shape
or visual design.

The uses for the CrystalCD are intriguing. It comes highly recommended and designers love the ability to have the disc perceived as a cut disc and know that the CrystalCD will have no problems with drive compatibility.

“Mac Pro recommends that nothing but a full sized CD be used for all of their slot CD drives, be it a G5 or the new Mac Book Pro.”

“The visual presence that the CrystalCD has is Extraordinary. I had more fun making the CD design than the actual packaging for the disc, and our customer response was nothing but WOW! Thank you OneDisc for recommending this Disc medium.”
