

# Print & Design Specifications

[ CD Artwork ]  
Updated July 2007

Please contact us at [info@onedisc.com](mailto:info@onedisc.com) or 800-427-0692 with any questions regarding the use of the design templates.

All of our CD art templates are in Adobe Illustrator CS3. Please contact us if you have any questions about working with them or about the specs below. OneDisc.com also offers professional graphic design services to develop your artwork. The cost for creating custom CD artwork is \$100.00.

**Preferred Applications:** Adobe Illustrator (.ai), Adobe Illustrator EPS (.eps), or Adobe Photoshop (.psd), please include all embedded and linked image files. Also, please ensure that all images are "high resolution" not 72dpi (i.e. Web Graphics).

**Acceptable Image Format:** TIFF

**Image Resolution:** 300dpi or better

**Colors:** Please use CMYK or PMS. Artwork done in Adobe Illustrator with both CMYK and PMS will incur additional printing costs. Unlike printing on paper, PMS colors work best on discs. 4 color artwork over a white flood is standard. If PMS is used please use only the Pantone® Coated Color Library for PMS colors. If there are going to be transparent areas on the disc please specify them and refer to the graphic below:

**Fonts:** Please outline your fonts whenever possible. Type 1 PostScript fonts recommended. Please include all fonts in a separate file with disc art if possible. Please do not "stylize" any fonts, use correct version (i.e. Helvetica Bold Italic).

**Review Process:** OneDisc.com reviews each design and will correct minor errors at no extra cost. If we see larger problems with your artwork we will contact you discuss the issues. In all cases you will be approving a 'Final Proof' (pdf or jpg) from our factory before production.
